Communicator  
EN54-21 Certified

CME21 Communicator

## Product Description

The CME21 is a device designed to provide certified communication capability from the fire detection control panel to one or more alarm receiving centers. Through the use of different means of communication, such as LAN, Wifi and GSM 4G/2G, it ensures redundancy as required by the European standard.

Supports different dialects of SIA protocols and Contact ID (encapsulated) towards the agency receiving the alarm (other protocols or dialects, upon request, can be incorporated).

## Main Features

- Certified EN54-21
- LAN, WIFI, GSM 4G/2.5G/2G connectivities
- 3.5" touch screen display
- 8 configurable balanced inputs
- 4 NC/NO relay outputs
- Dual power supply
- Multi-operator SIM integrated
- Customisation to user interface touchscreen for client logos
- 20 adaptable connection terminals for easy installation to Fire Control Panels
- 5 fixed terminals for RS232/RS485 integration
- Simple user interface for reporting status from connected CME21 units
- Integrated with ESPA444
- Customer protocol can be added upon request
